Anaheim, CA

Orlando, FL

With Custom Cable's logistics management, your cabling solution arrives ready for use. We customize this experience in any way that streamlines your process, safety, and results.

### Custom Cable advantage

- ☑ *Custom labeling*—We help identify products and product packages in a way that makes sense for your organization, product location, its application or the particular technology used.
- ☑ *Custom documentation*—We provide drawings, instructions and test results to support your end user's unique requirements.
- ☑ *Custom staging/organization*—We transform equipment, even items you own, into a "kit"—a complete, tested, functional package.
- ☑ *Custom packaging*—We can package our products in a way that supports your unique shipping, storage, use and quantity requirements. This speeds delivery, reduces your order time and delivery cost, and increases accuracy since all necessary components are staged, labeled and shipped as one package. We eliminate the need to place independent orders, wait for delivery and organize dissimilar groups of components.
- ☑ *Custom site/quantity delivery*—We make sure unique quantities are delivered on time to locations you specify. This reduces your cost by eliminating the need for your personnel and processes to handle and redistribute bulk orders to specific sites. The complete, packaged solution and site-specific delivery also reduce the opportunity for theft. We are experienced in packaging and delivering products domestically and internationally.
- ☑ *Custom Order Placement and Delivery Timing*—Our custom material ordering, manufacturing and delivery are designed to support the timing of your project rollout.
- ☑ *Inventory Use and Management*—We can accept, manage and use your inventory to supply a total Custom Cable solution.
