Custom Cable manufactures wiring harnesses and build-to-print cables. Our work reduces your costs in tooling and personnel, enabling you to balance your manufacturing capacity with customer demand for lower total operating costs.

### Custom Cable advantage

- ☑ Many Original Equipment Manufacturers (OEMs) find us a great resource for outsourcing their cabling needs and saving money in many ways. We have provided cables or harnesses for myriad industries: aerospace, audio-visual, data communications, medical, military, robotics, simulation, security, and test and measurement.
- ☑ Our manufacturing practices are based on meticulous workmanship standards, whether for a single prototype or high-volume production runs.
- ☑ Our quality control stations are designed, built and calibrated to accommodate specific test functionality for maximum reliability. Quality is non-negotiable.
- ☑ All cables and harnesses undergo a 100% electrical continuity test prior to shipment.
- ☑ Custom Cable has provided harnesses for a wide range of uses, including precision medical applications, baggage scanning devices, dry cleaning equipment, and automotive testing, to name just a few.
